Figures shown are past results for Class A shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. Unless otherwise indicated, results shown are at net asset value and do not reflect a sales charge. If the 3.75% maximum Class A sales charge had been deducted, results would have been lower. Certain fixed income and/or cash and equivalents holdings may be held through mutual funds managed by the investment adviser or its affiliates that are not offered to the public. Bond ratings, which typically range from AAA/Aaa (highest) to D (lowest), are assigned by credit rating agencies such as Standard & Poor's, Moody's and/or Fitch, as an indication of an issuer's creditworthiness. If agency

ratings differ, a security will be considered to have received the highest of those ratings, consistent with applicable investment policies. Securities in the "unrated" category have not been rated by a rating agency; however, the investment adviser performs its own credit analysis and assigns comparable ratings that are used for compliance with applicable investment policies. Taxable equivalent rates are based on the top 40.8% 2023 federal tax rate, which includes the 3.8% Medicare tax. 12-month distribution rates (yields) are for Class A shares and do not reflect the effects of sales charges. The SEC yield reflects the rate at which the fund is earning income on its current portfolio of securities, while the distribution rate reflects the fund's past dividends paid to shareholders. Accordingly, the fund's SEC yield and distribution rate may differ.
